TASK 1.1

1.1 Suppose you always log your vegetable intake in the evening, just before going to bed. Suppose that today you recall that you ate 3 serves of vegetables. Log that.

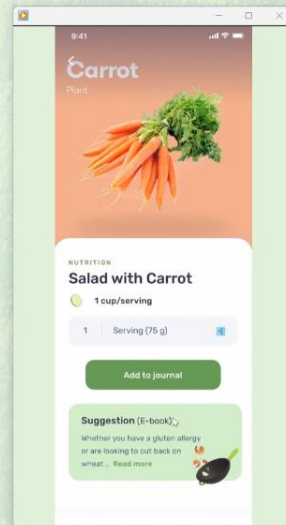

TASK 1.2

1.2 Suppose it's the weekend and you ate vegetables at different times throughout the day. In the morning you had 2 serve, and in the evening 2 more serves. Log a total of 4 serves for today now.

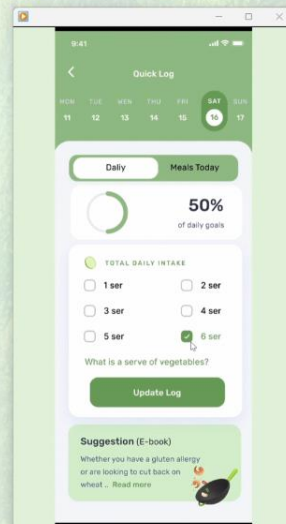

TASK 2.1

2.1 Suppose that, on reflection, you realise that you have over-estimated the vegetables you ate for dinner. So, for today, you now think you actually ate only 1 serves. Correct the logged record for today.

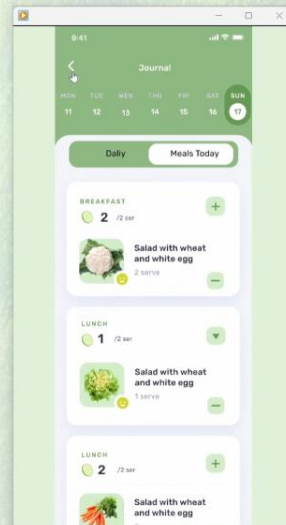

TASK 2.2

2.2 You've ingested and logged three servings of vegetables today, and you've taken three servings later, and you want to do a quick log, make changes.

TASK 3.1

3.1 Suppose you now remember about two cups of lettuce you ate at lunch, but you cannot recall how many serves that would make. Find out how many serves 2 cups of lettuce is. Then log this.

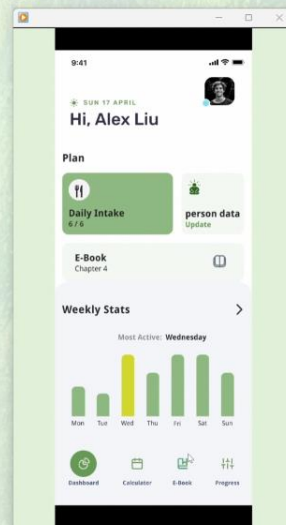

TASK 3.2

3.2 Suppose you remember eating 150 grams of lettuce at lunch, but you don't know how many serves that is. Find out how many serves 150 grams of lettuce corresponds to. Then log this.

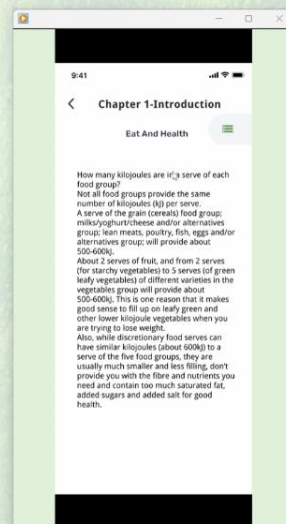

TASK 4.1

4.1 Please tell me which learning topics you have read and which you still need to read.

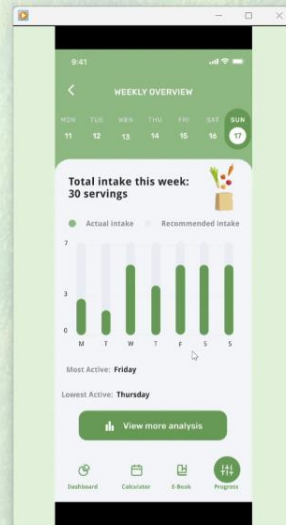

TASK 4.2

4.2 Let's say you've read and jumped back to the first chapter to see the information, and now you want to go back to where you're reading.

TASK 5.1

5.1 Suppose you want to understand whether your vegetable intake has improved since the beginning of the month. Use the progress feedback tool to reflect on your current habits and identify any trends.

TASK 5.2

5.2 [Initial state]: Serves for Mon–Sun have been logged for this week. Suppose you want to reflect on which days you ate fewer vegetables this week and identify if there's any pattern. Find out your vegetable intake trend over the week.
